

## Who says pool automation has to be costly and complicated?

Scheduling and controlling the operation of pool and spa equipment and related poolscape accessories is now blissfully automatic, simple and affordable. New EasyTouch® control systems eliminate the inconvenience of repeated trips to the equipment pad, memorizing operating sequences, opening and closing valves and resetting time clocks and thermostats.

What's more, EasyTouch systems set the standard for operating simplicity with push-button operation and clear, intuitive instructions and displays. Your EasyTouch system includes all circuitry and fully programmable controls in a single Load Center installed near your pool or spa equipment. This avoids expensive wiring and installation costs to make EasyTouch affordable for any budget.

## An Eco Select™ Brand Product

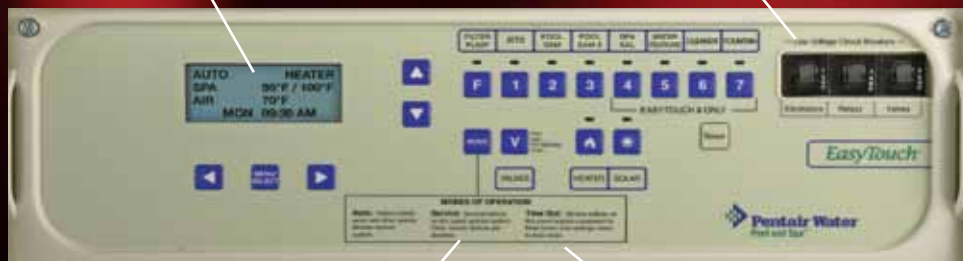

Pentair Water Pool and Spa® control systems can optimize energy use and equipment performance by automating and synchronizing equipment scheduling. They prevent problems and waste so you don't have to rely on your memory or limited time clocks to operate or turn off equipment.

As the global leader in pool and spa equipment manufacturing, we strive to provide greener choices for our customers. We hope you'll join us in embracing more eco-friendly poolsapes by choosing Eco Select™ brand products for your swimming pool.

# EasyTouch® Pool and Spa Control System

LCD display informs and instructs every step of the way.

Resettable circuit breakers are readily accessible by you or service professionals from outside your home.

Service mode aids in system testing and troubleshooting—no need for service personnel to enter your home.

Time Out mode allows programs to be interrupted and automatically resumed—no need to reprogram.

## It's like putting pool and spa operation on cruise control

EasyTouch® systems are available for a separate spa, a separate pool, or a pool/spa combination with shared equipment. You select from systems that control 4 or 8 accessory functions. Four-function systems are typically used to control pool and/or spa operation plus pool or spa lights and heaters. Eight-function systems allow separate scheduling for additional features, such as landscape lighting, waterfalls, fountains, additional heaters and more. Take the work and worry out of scheduling and operating pool and spa heating, filtration and cleaning cycles. For even greater convenience, you can add any of these optional controllers:

- All functions controlled with easy, one-button access from the Load Center.
- A variety of optional, simple to use remote, wired or wireless controllers for added convenience.
- Full programmability of everyday equipment operation for optimum efficiency. Re-program for variable pool/spa usage patterns or when adding or changing equipment to maintain peak efficiency.
- Onboard diagnostics make service simple. Built-in, self-test diagnostics give you the ability to verify correct operation of specific functions, and a diagnostic screen reports failures for troubleshooting and repair.

**Indoor Control Panel**  
(for 4 or 8 function control)

**EasyTouch Wireless Controller**

**iS4 and SpaCommand™ Spa-side Remotes**
